

The Headsaver

Brain injuries are irreversible.
Don't take the risk.

Are you constantly worried about your loved ones who are prone to falls?

HeadSaver is **stylish, lightweight, and comfortable** head protector designed to fit the lifestyle and specific needs of those who use them.

3 coverings available:

The Bed Alarm

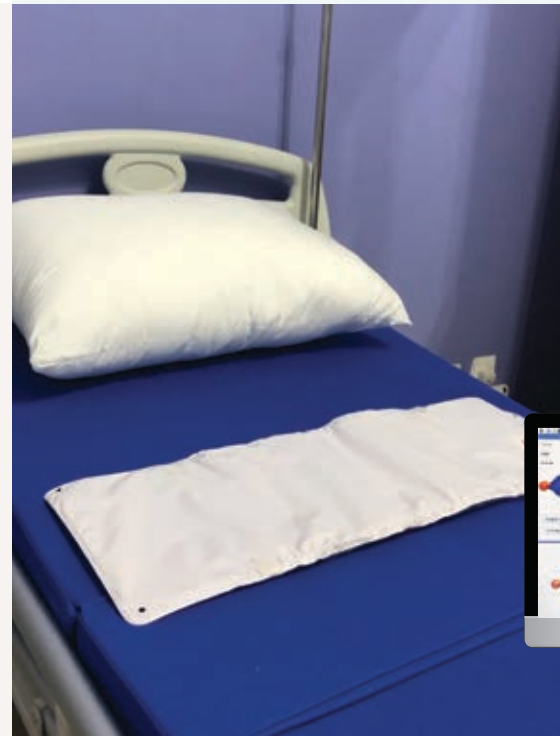

Falls are preventable.

The bed alarm is designed to alert caregivers as soon as the patient at risk of falls tries to get up from the bed.

The bed alarm is **available in 2 sizes:**

Wide: 520mm x 780mm

Compact: 300mm x 790mm

Up to 50 beds can be connected to a single monitor point, with a max distance of **200mt.**

The software can be adapted to any screen size.

Our **Headsaver** guarantees up to **56% reduction** in the peak impact force of a fall.

The Headsaver is the right head protector choice for all with medical conditions such as Epilepsy, Parkinson's disease, or Cerebral Palsy.

In general, it can make the difference between life and death in the elderly who are prone to fall-related injuries due to poor vision, weaker limbs, or drowsiness due to medications.

Our **Bed Alarm System** has dramatically reduced falls in all cases where it was implemented.

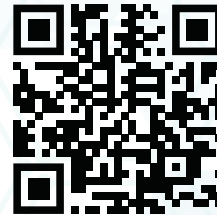

Our product is the right choice for a caregiver at home, a nursing facility, or hospital needing a quiet, audible and /or visual fall prevention system.

It connects wirelessly to a fall monitor or alarm unit. And can always be muted if needed.

We provide solutions to keep your loved ones **safe**.
